

SALTEX OPG

MADE FROM OLIVE PITS

GOOD FOR THE ENVIRONMENT.
ENGINEERED FOR PLAYERS.

Saltex, established in Finland in 1991 and part of the Unisport Group, is active in the development and manufacturing of innovative and high-end synthetic turf components. This includes artificial turf, shock pads and infills. As FIFA preferred provider and founding member of the ESTC, Saltex is ISO 9001 and 14001 certified.

SALTEX OPG

MADE FROM OLIVE PITS

GOOD FOR THE ENVIRONMENT.
ENGINEERED FOR PLAYERS.

Saltex OPG is a performance infill for synthetic turf systems made of 100% organic materials derived from olive pits and developed to meet sports functional criteria at the highest levels. Saltex OPG turf systems utilize a shock pad to provide safe and optimal playing characteristics.

SALTEX OPG

- Meets FIFA Quality Pro & Quality requirements
- 0% polymeric content
- Free from microplastics
- Produced carbon neutral
- Skin friendly
- Fully biodegradable
- Meets fire class Dfl and S1 according to EN ISO 9239-1

PRODUCT CHARACTERISTICS

- | | |
|-----------------------|--------------------------|
| • Bulk density | 730-780kg/m ³ |
| • Particle shape | B2 – EN933-1 |
| • Particle size range | 600-2000µm |
| • Color | Light brown |

SUSTAINABILITY

Saltex Blue Vision goes beyond eco-efficiency. The Blue Vision approach means not only minimizing negative ecological footprints and pollution but also making the largest possible positive footprint.

This is achieved by developing as environmentally-friendly products and processes as possible and seeing waste as a reusable material. In an eco-effective mind, economic growth and ecological added value go hand in hand.
